StonePeak Performance Group Capability Statement

Industrial Performance Advisory | Operational Excellence | Reliability | Execution Discipline

Company Overview

StonePeak Performance Group helps industrial companies build predictable performance through integrated operating systems, reliability frameworks, execution discipline, and measurable results. SPG is positioned as an advisory group focused on practical industrial execution, not generic consulting activity.

Service Pillars

Industrial Performance Advisory	Plant performance strategy, KPI governance, operational rigor, cost reduction, and continuous improvement.
Reliability Transformation	Maintenance planning, PM/PdM development, SAP/CMMS optimization, root cause analysis, and reliability culture.
Operational Stability Programs	Process consistency, shift execution excellence, operational discipline, production accountability, and loss elimination.
Industrial Leadership Development	Frontline leadership systems, accountability, coaching, communication, and performance management.

SPG Framework System

SPG Operational Stability Model™	Stabilize operations and reduce variability.
SPG Reliability Maturity Framework™	Move from reactive maintenance to predictable assets.
SPG Execution Excellence System™	Align KPIs, accountability, cadence, and follow-through.
SPG Industrial Performance Index™	Score maturity, identify gaps, and prioritize transformation.
SPG Operational Discipline Framework™	Embed standards, audits, governance, and sustainment.

Industries Served

Metals and smelting; mining and minerals; heavy manufacturing; industrial processing; automotive manufacturing; energy-intensive operations.

Engagement Approach

Assess current maturity and performance loss. Align leadership around priorities. Implement practical operating routines, standards, KPIs, and accountability systems. Sustain gains through governance, audit routines, and disciplined follow-through.
